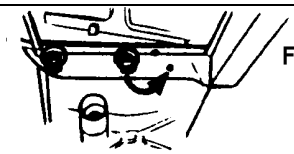
Fig. 2



**System for all Volvo 240-series.** The system above will fit on all Volvo 240-series with B21-/23 engines (except Turbo). The new front pipe P 7667 fits all cars 1976-80. But for 1981-83 cars a new hanger kit must be mounted on the gearbox (see fig. 1).

**Front Silencer.** Under the car you will find 2 hanger hooks for the front silencer. For cars 1976-80 it is necessary to remove the right hanger. Move it to the right to an already existing hole and screw it on. It is now possible to fit the silencer P 7668 (fig.2).

**Putkisto kaikkin Volvo 240-sarjan autoihin:** Ylläoleva putkisto voidaan asentaa kaikkiin 76 - 83 -mallisiin autoihin B21 ja B23 -moottorit, paitsi turbo. Malleissa 81 - 83 vaaditaan kiinnike, jolla putki P 7667 kiinnitetään vaihdelaatikon viereen. (kts. kuva/fig. 1.)

**Etuvaimennin.** Etuvaimenninta varten autossa on kaksi kiinnikettä (kts. kuva 2). Vm. 76 - 80: Irroita oikeanpuoleinen kiinnike ja siirrä se oikealla olevaan reikään. Nyt voidaan asentaa vaimennin P 7668.

Fenno-Catalytic Converters are 3-way converters.
They fit the most common car models using unleaded gasoline.
Universal catalytic converters are not e-homologated.

IMPORTANT! If the old converter shows signs of melting, fouling or cracking there is a failure in the car engine that must be repaired prior to installing a new converter!

Also exhaustgas adjustments and tuning have to be made before installation in order to prevent the damage of the new converter.

The manufacturer assumes no liability for damage or failure of a catalytic converter due to improperly tuned or maintained engine.

In cases of warranty/damage only the catalytic converter will be credited. Claims for mounting costs will not be accepted.

## Universal Cat NOTES

Yleiskatalysaattorin
huomautukset.

Fenno - katalysaattorit ovat 3-toimisia katalysaattoreita.
Ne sopivat yleisimpiin automalleihin, jotka käyttävät lyijytöntä bensiiniä.
Yleiskatalysaattorit eivät ole e-hyväksyttyjä.

TÄRKEÄÄ ! Mikäli vanhassa katalysaattorissa on merkkejä esim. sulamisesta, pullistumista, murtumista yms. on auton moottorissa jokin toimintahäiriö, joka on ehdottomasti korjattava ennen uuden katin asennusta ! Samoin pakokaasupäästöt ym. säädöt on tarkastettava ja säädettävä ennen asennusta, jotta uusi katalysaattori ei vaurioituisi.

Valmistaja ei vastaa vaurioista, tai katalysaattorin toimintahäiriöistä, jotka johtuvat epäasiallisesti toimivasta tai -huolletusta moottorista.
Takuutapauksissa korvataan VAIN katalysaattori, jossa todetaan olleen vikaa.
TYÖKUSTANNUKSIA EI KORVATA.
